Find better solutions faster | Cut sourcing time | Make confident, data-driven decisions

HOW TO LOG IN OR REGISTER

1 - WEBSITE

www.amphenol-industrial.de/en/ami

2 - ACCOUNT

AMI is available exclusively to registered customers.

3 - LOGIN

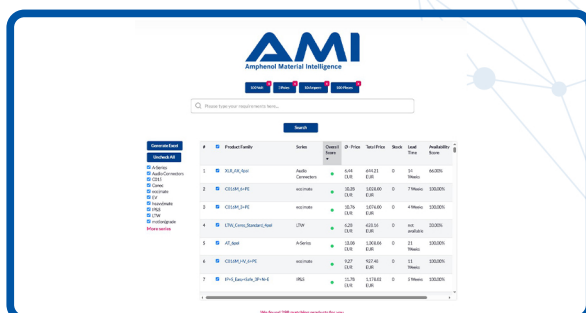

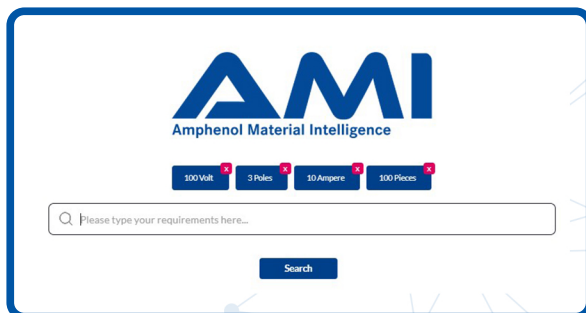

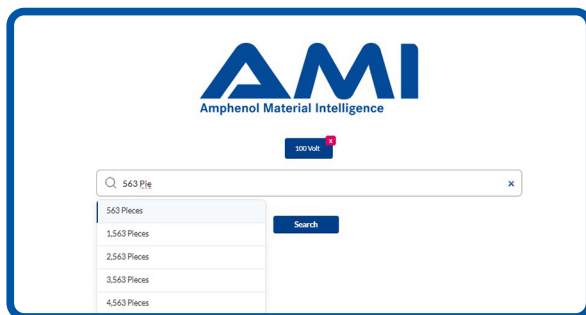

Click “Login” in the top-right corner.

NEW?

Click “Register” to request access – it only takes a minute!

HOW TO FIND YOUR MATE

Using the Search Bar

Start typing a technical requirement such as 200 Volt, 5 Poles, or IP67. A dropdown with valid options will appear – you must select from this list for AMI to recognize the input.

Don't Forget Quantity - You must specify a quantity (e.g., “100 Pieces”) – this is needed to calculate pricing and stock availability. Without a quantity, AMI will not start the search.

Add Multiple Requirements

You can add multiple technical criteria to narrow down results.

Each selected requirement will appear above the search bar. Only these confirmed filters are considered during the search.

Smart BOM Recommendations

After you hit “Search,” AMI instantly generates and compares BOMs to find your best technical and cost-effective match. Review all solutions side by side and see exactly what to order—including precise quantities for a complete connector pair. Even modular options are handled, like swapping a 3-pole for three 1-pole connectors when it's the perfect fit.
